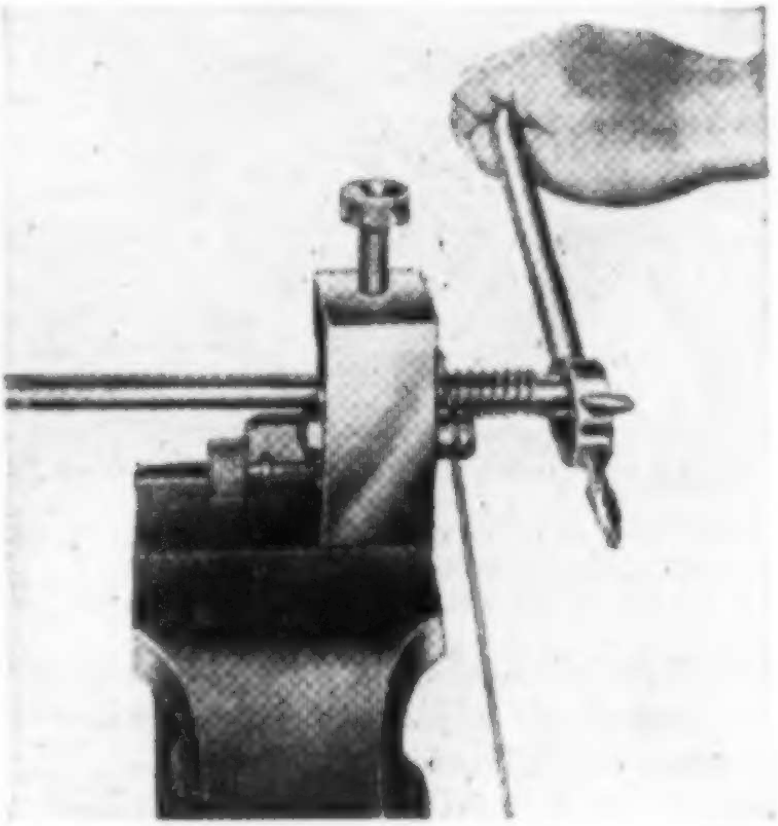
Portable Coil Spring Winder Now Available



Either compression or tension springs in any size up to 1-inch inside diameter can be made quickly and easily with the Crown Spring Winder. Desired pitch or length of spring can be produced from wire ranging up to maximum diameter of 1/8-inch. Winder is held in vise, spring wire is inserted through eye in tension control and attached to handle. Handle is then attached to mandrel which is held in winder, and handle is turned. Spring is made to any pitch by adjusting pitch regulator. Winder is supplied in wooden kit box containing five sizes of mandrels and six coils of various size spring wire. Only $37.50 complete.
